Human Female Model From IronicGame

This character can be used with the Character editor

All the texture from ironicgame can be shared between characters.

With this package you can make your own texture using the PSD template and photoshop. Then place the armor parts prefabs inside unity.
If you already have the Human male character package. You can use the editor to customize this character.
https://www.assetstore.unity3d.com/en/#!/content/51227

Note : the character editor as been updated to a C# version and will be updated soon to integrate easily the female model and the other character incoming.
More option like switching character and shader are comming along the character editor update.

Thanks for tyhe interest in my assets and your support !
